Update November 2025

URGENT

embracingadhd.org

In the last month we have had two instances where, for many years, a patient had failed to reveal information about their medical history. In one case the lady had severe relapsing anorexia from her teenage years. In the other the patient was on opiates and ketamine.

It is dangerous, indeed potentially life threatening, if you dont reveal to all your doctors what treatment you are having from other health professionals. We have a duty of care to you but cannot carry that out if matters are hidden from us.

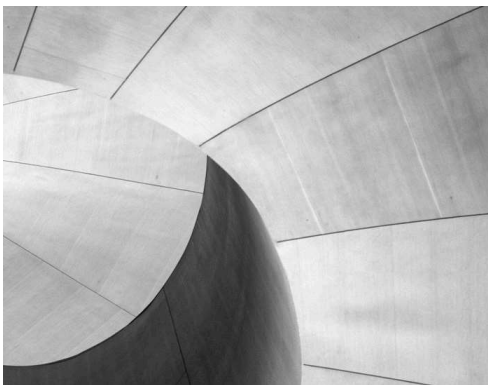

I have changed the treatment review form so that you are required to reveal other diagnoses and treatments each time you request medication. I am sorry if this is irritating but there is no way I can find that can take into account information you have previously given us.

We are coming to the end of another year. I and the team hope you have a pleasant xmas and prosperous and happy new year. We will be closed during the week of xmas and new year so send your treatment form in before 18 December if your renewal falls during that fortnight and we will process it for you. I am not going away so if something urgent occurs get in touch and I will deal with it as soon as possible.

Tony
